CAPITAL GOSSIP AND PROVINCIAL NEWS

WORK ON SOUTH MACLEOD IRRIGATION SYSTEM MAY COMMENCE THIS YEAR

The Weed Campaign
Municipal districts throughout the province are intimating their readiness to co-operate with the weed branch of the department of agriculture in a general campaign for weed eradication. Letters are being received by the weed branch which indicate that the municipalities are coming in line in splendid shape in the organization to clean the province of weeds.

During the past week the appointment was announced of Harold Wooster, of Namaka, as divisional superintendent of weed inspectors for southern Alberta. Mr. Wooster has been acting as inspector for the Lethbridge district. A divisional superintendent for the northern districts will be appointed shortly.

The department of agriculture is endeavoring to perfect community organization in the weed campaign, by enlisting the co-operation of farmers, and organizations of all kinds, as well as the railway companies and municipalities.

The convention of government weed inspectors held at Claresholm was a great success. All government inspectors of the south were present as well as a number of municipal inspectors. Hon. George Hoadley, took occasion during the convention to address a public meeting on better farming. To the weed inspectors W. J. St. John, Crop Commissioner, spoke on the weed act and the problems arising out of the act. J. C. Hoper, principal Claresholm agricultural school, spoke on the identification of weeds and weed seeds and had some very fine specimens both mounted and freshly collected. F. S. Grisdale, of the Olds school, spoke on systems of eradicating weeds, and Mr. Walker, manager of the Claresholm farm, spoke on cultivation. Dr. Talbot, provincial veterinarian, spoke on the identification of poisonous weeds, how they act on livestock, and the antidote. S. G. Carlyle, live stock commissioner, spoke on the relation of live stock to better farming. Harold Wooster gave a paper on the organization in the districts, and Howard Wright, of Airdrie, gave a paper on the duties and responsibilities of weed inspectors. There was a very lively discussion on all subjects. A similar convention was held at Olds last week, at which similar addresses were given and at which H. A. Craig, deputy minister of agriculture, spoke in place of Hon. G. Hoadley.

New Labor Commissioner
Announcement has been made by Hon. Alex. Ross, minister of public works and labor, of the appointment of Walter Smitten, of Calgary, to be commissioner of labor for Alberta, under the act passed at last session creating a labor bureau. Mr. Smitten will assume his duties at once. His first duties will be to organize the bureau of labor. It is the object of the government to co-ordinate all labor legislation which will come under the jurisdiction of the new department. Mr. Smitten has been secretary of the Alberta Federation of Labor for a number of years, and is known as one of the best authorities in the province and in the Dominion on labor matters. He has been a member of several boards of conciliation and was a member of the minimum wage board of the province.

Hon. George Hoadley, accompanied by S. G. Carlyle, will visit points in Minnesota and Wisconsin shortly to select two Holstein bulls which will be placed on government farms. Mr. Hoadley also expects to go to Ottawa to take up several matters of importance, including the question of grading of hogs which was to have started this year.

Trip For Members
A trip for some of the northern members of the legislature and northern residents through the southern Alberta Irrigation Districts and other parts of the south, is being planned by Hon. George Hoadley, minister of agriculture, to take place towards the end of July.

E. S. Bishop, recently appointed commissioner under the liquor act, has left for the east where he will conduct an investigation into the working of the several prohibition acts in force and the administration of prohibition departments of the various governments.

Farmers of the New West district near Vauxhall, have decided to organize an irrigation district.

A good deal of summerfallow is being undertaken this year, according to reports from southern Alberta. M. L. Freng, agricultural agent at Lethbridge reports considerable summerfallow being done in excellent manner, the practice of cropping the land in strips to prevent soil drifting has also been carried out this year north of Lethbridge to a considerable extent.

Stripping of fallow with corn and oats is also being carried out.

E. J. Freang, who has been appointed by Attorney-general Brownlee to act as commissioner under the southern Alberta drought relief act, has issued a statement from his headquarters in Calgary asking all farmers in the drought relief area who wish information concerning their own problems of finance to write to him. The area to be covered in the drought relief act has been defined by Mr. Freang as follows:

Commencing at the intersection of the north boundary of the 34th township with the eastern boundary of province, thence westerly along the said north boundary of the 34th township to the line between ranges 15 and 16, west of the 4th meridian, thence southerly along the said line between ranges 15 and 16 to the north boundary of township 21, thence westerly along the north boundary of township 21 to the line between ranges 25 and 26, west of the 4th meridian, thence southerly along the said line between ranges 25 and 26 to the north boundary of the 6th township; thence westerly along the north boundary of the 6th township to the western boundary of the province; thence southerly following the western boundary of the province to the point of intersection of the north boundary of the 6th township, thence easterly along the north boundary of the 6th township to the line between ranges 26 and 27, west of the 4th meridian. Thence southerly along the said line between ranges 26 and 27 to the north boundary of the 5th township; thence easterly along the north boundary of the 5th township to the Belly river; thence south-westerly, following the course of the Belly river upstream so far as it forms the boundary of the Blood Indian reserve; thence easterly and north-easterly following the boundary of the said reserve to the north boundary of the 3rd township; thence easterly along the north boundary of the 3rd township to the line between ranges 21 and 22, west of the 4th meridian; thence southerly along the said line between said ranges 21 and 22 to the southern boundary of the province to the eastern boundary of the province; and thence northerly along the eastern boundary of the province to the point of commencement.

Theatre Act Prosecutions

Several prosecutions have been initiated recently by Howard Douglas, chief censor and administrator of the Theatres Act. On June 5th, Joseph Matisko, of Kalwin, was summoned by Constable James, A.P.P., for not collecting amusements tax, contra to the Theatres Act. The case was tried before G. Woolley, J.P., at Airdrie, and the accused was found guilty and fined \$25 and costs (\$6.10) was the decision. The fine was paid. On June 12th, information was sworn out against E. Moore, of Islay, for operating a public hall without a license and on appearing before H. E. Rawle, J.P., the accused pleaded guilty and a penalty of \$10 and costs was imposed.

Ploughing Matches

Very successful ploughing matches were held during the past week or so at Vermilion, Lamont and Lacombe, in which there was a considerable number of contestants. The matches were held under the auspices of the department of agriculture. Several more are being planned.

Freight Rate Reductions

As announced from Ottawa, the special committee of the House of Commons on freight rates has decided upon the suspension of the Crow's agreement for one year, and has agreed upon the offer of the railways for a reduction of rates on grain of about 20 per cent. and on other basic commodities of 16.66 per cent. Premier Greenfield and A. Chard, Freight Supervisor of the Provincial Government, who have returned from Ottawa after giving evidence before the special committee, believe that the decision will result in a considerable benefit to the farmers of the west, and express hope for a further reduction later on.

A. Chard, freight supervisor of the government, has been taking up the matter of rates on shipments of fish from northern Alberta points, and hopes to be able to secure a reduction of the surcharge on Alberta shipments which it is claimed operates to the disadvantage of shipments from Alberta.

New pamphlets on practical irrigation and summerfallow have been issued by the department of agriculture.

The Grasshoppers

Campaigns against the grasshopper are proving very effective in southern Alberta. The need of continued effort is emphasized, however, and also the necessity of economizing in bait where possible. It has come to the attention of the agricultural department that many are placing bait during the

afternoon. This has been found to be a waste of bait. The proper time to place bait is generally between 6.30 and 9 in the morning. It has been found also that proportions of two-third sawdust and one-third bran is having good results. It has also been found possible to cut down the amount of molasses to an amount not exceeding two quarts to every 100 lbs. of dry material, increasing the proportion of salt to five pounds. If these proportions are used in mixing bait, economy can be effected, and just as good results obtained.

Women's Institutes

The convention of women's institutes held at Calgary was the most successful in the history of the organization. Over 300 delegates were in attendance. One of the chief speakers was Hon. Geo. Hoadley, minister of agriculture, who explained the new status of the women's institutes under the amendments passed last session, and who declared the intention of his department to continue to aid the institutes in extending their efforts. The government in the new amendments, had merely made provision for all women's societies to have an opportunity of having extension work. The department, while it no longer would pay the expenses of all delegates of the institutes to the annual convention, had this year paid the expenses of the advisory board and provincial convocations of committees. Mr. Hoadley said the advisory board would be consulted whenever changes in legislation affecting the institutes were in contemplation. Miss McMillan, director of extension work, declared her desire to assist in furthering the work of the institutes and in assisting them as well as other women's societies in doing valuable community work. She said that her desire was to see the office of the extension service used as an information bureau for all women's societies, especially those in rural districts. A very interesting program of addresses was delivered during the convention.

Principles of the Drought Relief Act

The object of the government in passing the legislation known as the "Drought Area Relief Act" was that of providing the machinery and enabling resident farmers coming within the scope of the act to get together with their creditors and reach an amicable settlement of their financial difficulties, and at the same time to give to such farmers the opportunity of providing food and other equipment for their family sufficient to carry them along until the fall of 1923.

The legislation can also be considered as an outcome of the report made to the government by the Southern Alberta Survey Board, and is a definite attempt to improve conditions generally in the area reported upon by that Board.

Scope of Act.

The underlying principles of the Drought Area Relief Act include the establishment, by proclamation, of the territory coming within the Act, and the appointment of a Commissioner to have general supervision and administration of the Act; division of the area into districts and the appointment of Deputy Commissioners to assist and act in such matters as may be delegated by the Commissioner.

The proclamation has been issued, defining the area, and appointing Mr. E. J. Freang, of Calgary, as the Commissioner, while it is expected that the area will be divided into districts corresponding as far as possible to the judicial districts of the Province, with the appointments of deputies, probably from the Court of Officials, for such districts. This will mean the division of the area into the districts of Macleod, Lethbridge, Taber, Medicine Hat and Hanna.

Duties of Commissioner

The Commissioner is required to endeavor to adjust matters between residents in the area and their creditors, so as to provide for the satisfaction of the just claims of the creditors without recourse to legal proceedings as far as possible, and in doing this the Commissioner has power to summon witnesses and to require them to give evidence on oath, orally or in writing, or on solemn declaration, and to produce such documents as may be deemed requisite for a full investigation of the matters into which he is authorized to enquire.

This means that if the Commissioner in investigating the financial condition of any resident farmer feels it necessary to put either the debtor or any of his creditors on oath he may do so, and it provides the opportunity of seeing that the proceeds of this year's crop are handled with the idea of distributing same as fairly as possible without recourse to the law courts. It also opens the way, in all probability, in some cases to a compromise which

Hon. Vernon W. Smith, provincial minister of railways and telephones (under whose department the provincial irrigation work has been placed) accompanied by Deputy Minister Callahan, arrived in Macleod Monday evening last, remaining till noon Wednesday. Mr. Smith was here investigating drought conditions in this district and was accompanied on his inspection tour by W. H. Shield, M.L.A., R. T. McNichol and A. R. McFadden. It is understood that the Board of Trustees of the South Macleod Irrigation District had previously made strong recommendations to Mr. Smith's Department that sufficient

work on the South Macleod Irrigation system should be proceeded with this year to make for needed relief in this district. On the hon. minister's arrival an informal meeting was held in the South Macleod Irrigation District office at which were present the trustee board, members of Bright Municipal Council and a number of representative farmers of this district, who discussed at length with Mr. Smith the local situation. Also resolutions from Bright Municipal Council and Town of Macleod Council were submitted—these supporting the S. M. I. District trustees in their

efforts to have work commenced at once on the South Macleod Irrigation system. As a result of this meeting and the minister's subsequent tour of inspection we are informed that Mr. Smith was impressed with the necessity of relief measures and that prior to his departure he assured the South Macleod Irrigation District trustees that the matter would be taken up with the cabinet at Edmonton on his arrival in the capital city.

In view of the fact that an immense sum of money has within the past four years been expended by the provincial government in relief measures loans in this district (\$140,000.00 of which is still unpaid) it would seem reasonable and a business proposition on the part of the government to advance a substantial sum (as in the case of the United Irrigation District) for the initiation of work on the South Macleod Irrigation system—such work to be done by residents of the district and pay for which would constitute relief measures in the nature of expenditure on the work—not a loan involving loss without return to the government—as the advance would be repayable to them on the eventual guarantee of the bonds.

standing in a pool to cool themselves. If there are any tuberculous animals among the herd that pool is an infected pool. Any animal drinking from that pool has the chance of becoming infected. I think, therefore, gentlemen, I am safe in saying that instead of endeavoring to prevent the spread of infection it would be far easier and far more profitable to first get rid of the infection and then after you have got rid of the infection to exert all your powers in providing for your healthy cattle an environment that is free from tuberculous cattle and also free from materials infected by them."

Do Not Sign Documents.

It is quite probable that cases will arise where farmers are asked by insistent creditors to sign some kind of a document, the impression being that this will not make a great deal of difference anyway but that it might establish greater confidence between the farmer and the creditor.

Such a document may be all right, but on the other hand it may be one which will cause trouble in the very near future and make conditions considerably harder for all parties concerned in arriving at a satisfactory settlement.

Exemptions From Seizure

Power is given to the Commissioner to issue certificates in favor of a debtor, certifying that such debtor is entitled to certain exemptions from seizure over and above those allowed in the Exemptions Ordinance, if he is satisfied that it is in the interest of the debtor to do this, and this exemption may be made to include sufficient seed grain to take care of the 1923 crop.

Property Seizures.

Provision is made whereby the Lt. Governor in Council can, by proclamation, if necessary, stay all proceedings of every kind except where a Judge has granted leave to one creditor, acting on behalf of others, to start action. This should prevent a multitude of legal actions this fall, and therefore eliminate considerable expense. Even in such cases, however, the Commissioner has the power to make application to the Judge, without notice to any other party, that a receiving order be issued appointing the Commissioner receiver for the whole crop. Provision is also made to do this if it is thought that the farmer is not trying to do the right thing. This should be of considerable assistance and not only farmers but their creditors also should be encouraged to make applications to the Commissioner for enquiry into the affairs of any debtor.

Those Coming Under the Act.

The Act specifies that a resident means a person who has been resident and actively engaged in farming operations in the drought area, established by proclamation, for one year prior to January 1st, 1922, and who continues to be so resident and engaged.

Farmers who have had any trouble with their creditors, or who anticipate that trouble might arise, will find it to their interest to communicate at once with the Commissioner at Calgary so that he can make inquiry into the circumstances, and it would be advisable when writing, to mention the land owned or occupied, so that the Commissioner can check up at once whether it is included in the drought relief area.

It may probably be thought that this work will apply only to those resident within the drought relief area, and while this is true as far as it relates to the provisions of the Act itself still there is a strong probability that the Commissioner may, by advice and recommendation and by consultation with the creditors of such farmers, be able to assist materially many who do not really come within the scope of the Act.

It would be a good idea to write the Commissioner anyway and find out just how the whole matter stands.

Need For Immediate Action.

One point which should be emphasized is the need for immediate action on the part of those intending to avail themselves of the provisions of the Act, and it is recommended that the farmer or his creditor should at once take the matter in hand, so there will be plenty of time to check up all the work.

If application is made at once, the Commissioner will be able to attend to all the details of the case and, with the proper spirit of co-operation and confidence, arrive at a settlement or understanding which should be satisfactory

to all parties concerned. If too much time elapses before such application is made it will mean that harvest will be here, that the grain is ready for market and that no agreement has been made. In such cases it is reasonable to suppose that dissatisfaction and unnecessary expense will be saved. It is just as easy to take this in hand at once, and the suggestion has been made that it is better to have the applications in the hands of the Commissioner before August 15th next.

Special Relief.

There is one clause in the Act which is very important, but which may be overlooked. This provides that in order to secure any debt contracted since April 1st, 1922, for seed, twine, and farm labor used for the production of this year's crop, and for food and clothing of the debtor, mortgages or encumbrances may be given to an amount not exceeding \$500, notwithstanding the provisions of any other act.

This is very important in districts where the government had to give relief during the winter, as it should enable the farmer to borrow from a bank by giving a mortgage or lien on his crop, and thereby secure financial help at a very critical time which, otherwise he may not be able to get. It is suggested, however, that it would be advisable for any farmer contemplating securing advances of this kind, to just take the matter up with the Commissioner and secure his advice thereon.

A good policy to adopt at the present time is that no agreements or documents of any kind should be signed until advice has first been secured regarding same, and it would be a good idea to secure such documents and send them to the Commissioner, Drought Area Relief Act, Calgary, for examination and information thereon, before completing them. This will not mean very much delay, but at the same time it may save considerable trouble in the future and if this is so then the delay is well worth while. A good plan to adopt at the present time is that of thinking first and securing the necessary information before completing any agreement, and the Commissioner will gladly assist in this matter if given the opportunity to do so.

It must not be forgotten that we are dependent upon human machinery in all cases such as this, and that it is necessary for the individual to make the first move in securing relief. The Drought Area Relief Act is not intended as a panacea for all evils, neither will it automatically apply to every person in the area coming within the Act. It is necessary to make application to the Commissioner before the Commissioner can do anything for you, and this is a very important point which should not be forgotten.

Preventing Spread of Tuberculosis
Dr. George Hilton, Chief Inspector Health of Animals Branch, Department of Agriculture, Ottawa, has this to say concerning the "Results obtained under the Accredited Herd System, and the proper housing of live stock in order to prevent the spread of Tuberculosis":

"I want to say definitely in the first place, that if tuberculosis exists on the premises it is not practicable to prevent its spread entirely. This may be retarded, or enhanced, by good or bad stabling. In considering this question we must remember that the tubercle bacilli which cause this disease are definite material things that are expelled in various ways from the bodies of tuberculous animals. You must not forget that you must not forget also that these animals are the only source of these bacilli. That is the only place they come from. You must also remember that these bacilli have no independent power of movement; they must be carried in the milk or manure or other secretions, and discharges from the bodies of infected cattle. It has been stated by an authority that if contact between healthy individuals and tuberculous ones, and between materials derived from or which have been in contact with tuberculous individuals could be prevented, tuberculosis would soon cease to exist. It is important to remember that tuberculosis is strictly a contact disease, and that infection spreads by contact with an infected animal, or with materials infected by contact with an infected animal, or with materials infected by it. In the large majority of cases infection occurs by ingestion. Cattle are infected by eating infected fodder or drinking infected water, or by coming in direct contact with a tubercu-

lous animal. Now, we all know that in order to maintain a herd in the highest vigor and to keep the resisting power of the individuals in that herd up to the highest possible standard, it is necessary to house them in a building which permits the largest possible amount of sunshine to enter its interior; we need at least four square feet of window space per animal. We also know we need plenty of air space that we should have at least 500 cubic feet of air space per animal. We also know that the vitiated expired air must be removed from that stable by a ventilating system and that fresh air must be brought into that stable to replace it. We also know that the stable must be properly drained. You must drain it well. We have a large number of modern cattle barns which have all these requirements. You walk into one of these stables and you have an unobstructed view of several rows of fine looking animals. It gives a visitor at once an excellent impression. But what do we find? We find our livestock breeders have overlooked the fact that tuberculosis is spread by contact. We have many such buildings erected upon the best sanitary principles and yet we find that the stanchions which are used in fastening these animals, permit the animals to come in contact with their neighbors any time they want to. One of our inspectors was passing through a stable a short time ago where he was conducting a combined intradermic and ophthalmic test, and he noticed one animal had a copious purulent ophthalmic discharge from the right eye about two inches in width. In returning he noticed the discharge had entirely disappeared. He went up to it, and examined its face, and it was clean as could be, and wet. It did not dawn on him for a minute that the animal next to it could have licked it off. He was trying to decide what had happened, and went back and sat down and watched. He waited for some time and finally noticed this animal turn around to the next to it, and the next to it started to lick its face. It was therefore evident that the discharge had been licked off. This incident just shows that even in an excellent stable, the animals were in contact with each other all the time. In that stable there were many reactors and they were standing next to each other in one row. The infection had been carried right down from one end to the other, with the exception of two at the end which did not react; at the next six months' test these two animals would be reacting. I want to emphasize particularly that tuberculosis spreads by contact, either by an infected animal or by material derived from it or infected by it, and that it is essential if you desire to prevent the spread of infection, to prevent contact. Now, you will readily see, if you think for a few minutes, just what position you are in if you are going to try to prevent the spread of infection in the stable. You do not know which animals are infected, but you do know that the infected animals are constantly or intermittently expelling live tubercle bacilli from their bodies, largely from the manure, but also, to a certain extent, through their nostrils and mouth by coughing. How are you going to prevent infected material from coming in contact with the other animals? How are you going to know what material is infected or not? Now, in these modern barns they have a long continuous feed trough. That is another channel in which infection can be carried. These troughs are cleaned out. You do not always feed your cattle yourself; you have your hired man. He thinks one animal has too much feed and he throws it across to another, and that animal may be infected and that fodder may be infected. All these points have to be considered. There is another danger, the tubercle bacilli can be carried by the water in a defective water system. If the water can come from one cup up into another cup, and if an animal is infected other animals will be infected also. There is a truism; that the longer and the oftener an animal is exposed to infection the more certain it is that animal will become infected; and under these conditions where animals can come in contact at any time they desire, as I have just pointed out in these stables, you are sure to spread infection, you cannot help it if it is there. We must also not overlook the infected pastures and drinking pools. In the summer where the flies are troublesome, you will often find cattle

standing in a pool to cool themselves. If there are any tuberculous animals among the herd that pool is an infected pool. Any animal drinking from that pool has the chance of becoming infected. I think, therefore, gentlemen, I am safe in saying that instead of endeavoring to prevent the spread of infection it would be far easier and far more profitable to first get rid of the infection and then after you have got rid of the infection to exert all your powers in providing for your healthy cattle an environment that is free from tuberculous cattle and also free from materials infected by them."

Canadian Flax Cultivation

Gratifying Progress Made in Recent Years.

Since the inception in 1916 of the Division of Economic Fibre Production in connection with the Dominion Experimental Farms, such progress has been made in flax growing in Canada that, for every acre cultivated six years ago, there were in 1920, thirty-two acres under culture. What is more, seed is exported to Ireland and other countries; and it has been proved by actual spinning tests that Canadian fibre is suitable for the manufacture of the finest linen damasks. Also that the fibre obtained from flax grown on the experimental farms in the western part of British Columbia, in Ontario, the valley of the St. Lawrence, and in the Maritime Provinces, has not only been of first-class quality, but equal to the best grades of Irish or Belgian. How much this gratifying and encouraging state of affairs is directly due to the work of the Division it is not possible to say, but that much of it is owing to the recommendations, advice, seed distribution, experiments, research, etc., made by the Division is undoubtedly. A set-back was experienced in 1920, when the flax building, with much valuable machinery and patiently compiled records, was destroyed by fire, but despite this disaster the work has been constantly extended.

The Division through its careful and thorough testing of every newly invented pulling, deseeding or scutching machine, has been able to furnish information of the greatest value regarding the effectiveness of these necessary implements. Tests of exceeding usefulness have also been made relative to reliable varieties, commercial scutching, fertilizing, binder twine making, retting, and the recovery of flax tow. A system of grading has been adopted whereby purchasers are enabled to carry on their business without personal inspection, and the examination and grading of seed for export is undertaken. Another important arrangement is the despatching to flax growers, spinners, and any one interested in the production of cablegrams outlining conditions and prices prevailing in Europe received from the Irish department of agriculture.

IN THE LOCAL POLICE COURT

In the local police court during the month of June there were four convictions for infractions of the Liquor Act with fines aggregating \$175.00. Two convictions also for drunkenness in which cases fines of \$10 each were imposed.

The Retort Courteous.

The retort courteous, as well as sarcastic, is instanced by a story of the Abbe de Voisenon, who had the misfortune to offend the great Conde. When the abbe went to court to make his peace, the offended prince rudely turned his back on him. "Thank heavens, sir, I have been misinformed. Your highness does not treat me as if I were an enemy." The prince, taken by surprise, demanded why he thought so. "Because, sir," answered the abbe, "your highness never turns his back on an enemy."

That war in China was like a laundry ticket.

THE EMPRESS THEATRE CURRENT ATTRACTIONS

"BIG GAME" SHOWS PRIMITIVE COURAGE

May Allison Has Good Medium In
Photoplay Adaptation of Stage
Success

All lovers of the photoplay, with the gift of discriminating pictures of distinction and rare merit from the ordinary, will unite in hailing the announcement, that "Big Game," starring May Allison, the popular Metro star, will come to the Empress Theatre on Monday for a run of two days.

May Allison has won a numerous following by her appealing personality, and in this photodramatization of the famous New York stage success by Willard Robertson and Kilbourn Gordon, she has a medium for the rich expression of her dazzling personality.

The reason "Big Game" will be enjoyed by everybody without exception is that its appeal is so universal, the story of a man's fight to convince himself that he is no coward, and to save the woman he loves. May Allison has the part of Eleanor Winthrop, the charming wife of "Larry" Winthrop, heir to the millions of the old Boston Winthrops. She believes Larry the essence of all things manly, but during an adventure in the Northern Canadian woods, to find hidden

gold, her conviction totters when she finds him afraid of Henri Baptiste, a Canadian-French guide. Baptiste is bent on winning Eleanor by force, and the transformation of Larry from a weakling to an infuriated vengeful primitive is one of the fine achievements of the picture.

The supporting cast includes Forrest Stanley, Edward Cecil, Zeffie Tilbury, William Elmer and Sidney D'Albrook. Edward T. Lowe, Jr., did the adaptation, Dallas Fitzgerald directed, and Jackson Rose photographed. Sidney Ullman is responsible for the art designs and execution.

MAY ALLISON IN "BIG GAME," STAGE SUCCESS

Is a normal man, a civilized man, prepared to fight to the death for the reputation and love of his wife? This is the thrilling theme of "Big Game," the Metro special starring May Allison, which comes to the Empress Theatre on Monday for 2 days.

"Big Game" is the story of such a test, and the struggle occurs in the Northern Canadian wilderness, with "Larry" Winthrop, heir to the Winthrop millions, and his charming wife, have come adventuring. Their guide, Henri Baptiste, decides to appropriate the wife. Larry is seized with fear, until his emotions come to play, and

there is a fierce, brutal fight.

For her supporting cast, Miss Allison has Forrest Stanley, Edward Cecil, Zeffie Tilbury, William Elmer and Sidney D'Albrook. Dallas Fitzgerald directed this adaptation from the New York stage success of Willard Robertson and Kilbourn Gordon. Jackson Rose photographed, Edward T. Lowe, Jr., made the screen adaptation, and Sidney Ullman did the art direction.

THE SCREEN VERSUS PULPIT

While it is no new thing for an author to endorse the picturized version of his story, it is rather exceptional when an author who is at the same time a Minister of the Gospel, declares that the screen is an infinitely better medium for reaching the public than the pulpit.

Yet that, according to Henry Alexander MacRae, the well-known Director, is exactly what Ralph Connor has said. Ralph Connor, which is the pen name of the Reverend Dr. C. W. Gordon, wrote a very large number of novels, prominent among them "The Sky Pilot," "Black Rock," "The Prospector," "Cameron of the Royal Mounted" and "The Foreigner." "The Foreigner" was made into a picture by Director MacRae and under its new title—"God's Crucible"—will be shown next Wednesday and Thursday at the Empress Theatre. It is a Hodkinson release and the cast includes Wilton Lackaye, Gaston Glass, Gladys Coburn, Bradley Barker, Kate Price and

EMPRESS THEATRE NEXT WEDNESDAY AND THURSDAY

many other prominent players.

Mr. MacRae says: "Dr. Gordon spent considerable time with me in Winnipeg during the production of 'God's Crucible.' I found him a very charming gentleman and one with very decided views concerning the motion picture industry. At the start of my first talk with him I found him much opposed to both the stage and the screen—in fact anything pertaining to things theatrical. Dr. Gordon

and I thrashed the subject out and I am glad to say that I finally succeeded in showing him just how wonderful a medium the screen could be made. And before I was through with him he told me that he was infinitely pleased to be shown the error of his ways and that he was really convinced that one could do more from the screen than from the pulpit—a truly extraordinary admission from a Min-

ister of the Gospel to make."

The Story

Michael Kalmar is a power in his native land. For political reasons he is jailed and his children, Ivan and Irma, with a faithful old family servant are forced to flee to Winnipeg, Canada, to escape a like fate. Here they are taken up by Makaroff, who unknown to them, is an enemy of their father. Ivan Kalmar is a master of the violin. His playing attracts the interest of Marjorie Menzies, who is socially prominent in Winnipeg. Marjorie is wooed by Mortimer Stanton, district attorney in Winnipeg, who is jealous of the attention she shows Ivan. Stanton insults Ivan at a social gathering to which Marjorie invites him to play. Ivan leaves, unhappy and discouraged.

Michael Kalmar learns that his children are practically in the power of Makaroff in Winnipeg. At a gathering at the home of Makaroff, Ivan's sister is insulted. In the fracas which ensues, the lights go out and Irma is slain. Michael Kalmar disappears and Ivan is accused of trial. Stanton, the district attorney, is particularly vindictive and things look black for Ivan when suddenly Michael Kalmar reappears. In an intensely dramatic moment he (Michael) announces that he slew his daughter's insurer. Ivan is released and Michael begins to serve his prison sentence.

Through Marjorie's influence Ivan is engaged by Jack French, a wealthy ranch owner. Ivan proves himself more than helpful to French, as a result of which French promotes him to be foreman of his coal mine. Makaroff schemes with Stanton to obtain possession of the mine, which he does, but finally is routed by Ivan. In revenge Makaroff plans to destroy not only Ivan but Jack French, Sir Robert Menzies, and all those others who he thought were conspiring against him. His plan miscarries and he himself is destroyed. The true murderer of Irma's assailant confesses, Michael Kalmar is released.

MORTGAGE SALE OF FARM PROPERTY

Under and by virtue of the Powers of Sale provided by the Land Titles Act, and under a certain Order of the Registrar, Netherlands Investment Company of Canada Limited will offer for sale until the Fifteenth day of July, 1922, the following property, namely:—

South-East quarter of Section Ten (10), and those portions of the East half of Section Three (3) lying north and west of the Waterton River, all in Township Six (6), Range Twenty-Six (26), West of the Fourth Meridian, reserving unto His Majesty all mines and minerals.

The Vendor is informed that the above property is situated about twenty (20) miles from the town of Macleod. The soil is black loam, sixty acres being cultivated.

There is a five roomed house, an addition thereto, and a barn 20 feet by 30 feet, and other outbuildings erected on the lands, with a good supply of spring water, and over a mile of wire fencing.

Terms of Sale to be 25 per cent. cash and terms to be arranged.

For further particulars apply to Lougheed, Bennett & Company, Calgary, Alberta, Solicitors for Netherlands Investment Company of Canada, Limited. 3-12, 14, 17

from prison, and Ivan, who has become wealthy through the discovery of a new coal field, tells Marjorie, a willing listener, of his love for her.

All worries at an end, the young couple face a sunlit future, having gone triumphant through God's Crucible.

Orville Wright was being reproached for not taking up the challenge of the Smithsonian Institution that it was Langley, not the Wrights, who was the first to fly. A banker friend of Wright's said, "The trouble with you, Orville, is that you are too taciturn. You should go in for more publicity. Assert yourself more." "My dear friend," Orville Wright replied, "the best talker and the worst liar among the birds is the parrot."

NOTICE To All Theatre Patrons Reduction in Prices

Believing that the increased Tax is proving a burden on the public, the management of the Empress Theatre has decided to try and relieve this, by

REDUCING PRICES of ADMISSION to:
ADULTS, 30 cents
CHILDREN, 12 1-2 cents

Commencing Monday and Tuesday, July 3rd and 4th, for all ordinary programmes. These prices are considerably cheaper than those of the City of Lethbridge.

Our policy is to give a good clean show consisting of Pictures and Musical Setting equal to those of many city houses, at popular prices.

As we have a much smaller population to draw from THIS WILL ONLY BE POSSIBLE WITH A LARGELY INCREASED ATTENDANCE. PLEASE GIVE US YOUR HEARTY SUPPORT. If you have any complaint against Pictures or Prices tell the Manager.

Dunlop Double-Life, High-Mileage Cord and Fabric Tires Will Save You More Money Than Ever

Compared to a few years ago tire users are getting easily double—and even more than double—the mileage in the tires of to-day.

Ten, twelve and fifteen thousand miles are just average mileages to-day. And the records on the road show that Dunlop Cord Tires and Dunlop Fabric Tires are even exceeding these mileages.

With Dunlop big mileage you have rock-bottom prices and paramount tire quality—tire quality that is accepted as standard to-day, and which other makers are vainly striving to duplicate.

When you can get a tire with prestige back of it like DUNLOP, and with practically an unlimited guarantee, why chance your life on a second-rate tire at any price?

In Dunlop Cord Tires you have "Traction" and "Ribbed" to choose from.

In Dunlop Fabric Tires you have "Traction," "Ribbed," "Special," "Clipper," "Plain."

Police Smoker

Crozier's gone to Cypress
And Johnny's in command;
He's boss of this detachment
And a ruler in the land.

He's very consequential,
He puts on lots of airs,
He smokes his mild Havanas,
And a patrol packet he wears.

He is a sly old snoozer,
He likes to be well fed,
He always packs a nose-bag,
To cover up his head.

—Old Song

"Then pass the tea and let us drink
To the 'Guardians of our Land.'
You bet your life it's not our fault
That whiskey's contraband."

—Old Song.

When the history of Canada's grand old force comes to be written up it will not be complete unless a number of the old songs are included. In the early 80's, life in any of the Mounted Police barracks scattered hither and yonder over hundreds of miles of blizzard swept prairies would have been maddening indeed had the little sing-songs almost nightly indulged in by the men been prohibited.

The long barrack room with the

men's beds ranged neatly along both sides, the kit of each man neatly arranged on the shelf at the head of the bed, the table, oftentimes only roughly-hewn boards spiked to a frame-work driven into the hard-packed earthen floor, ranging down the center of the room, the huge stove gleaming redly, occupying the centre or one end of the room. The men seated around the table, some reading, others playing cards and it might be, in a quiet corner, a comrade busily engaged in reproducing from a colored frontispiece of one of the great English illustrated magazines, a grand lady pictured thereon, or one of the many scenes common in those days, such as Indians hunting the buffalo, the making of braves, sledge dogs on the trail, or perhaps a favorite troop horse.

After a while the card playing comes to an end, the men group together and a "Come All Ye" is started. Every man must sing or tell a story and as there were men who had served in the Irish Constabulary, the Household Cavalry, the Cape Mounted Rifles and other noted regiments, it is not surprising there were many good singers, musicians and story tellers amongst them. There was one man in "B" Division in the winter of 1882, who had held a commission in the English Navy and proudly displayed a medal and vellum describing his res-

cue of a member of his crew in mid-ocean. He was in the water half an hour before the boats that had been lowered picked both men up. A sailor artist had painted the ship and the officer in the act of plunging into the sea to save the drowning man. Did he value that picture. I'll tell the world he did!

The barrack room door opens and in comes the troop orderly. The roll of names is read. Every man is present or accounted for—there is nowhere to go, the nearest point being 250 miles away—the orders for the following day are read, the bugle sounds "Lights Out," and the lights in barracks, save in the guard room and officers quarters, are doused and another day is wiped off the calendar. Outside a howling blizzard may be raging, but within all is warm and comfortable.

Before the advent of the railway mail was received once a week during the summer, once a month, perhaps, during the stormy periods of the winter. Great events might be happening in the outside world but the men on some of the far out-lying detachments knew it not for many weeks and perhaps months afterward.

The members of "M" Division, Macleod barracks, held a "Smoker" last Monday evening, inviting a large number of their Macleod friends to be present. The scene, as the writer entered the room, brought back old-time scenes very vividly. The blazing lights, the long tables at which the men were ranged, the men in uniform, their friends in sombre black, the good things being urged upon the guests. At the piano was a clever local musician while another was singing a rollicking song. The spirit of festivity was certainly abroad in the land for this one night at least, and for the last time, regret to say, at the Macleod barracks, at last to be abandoned by order of the authorities at Ottawa.

NOTICE

The Drought Area Relief Act

The Drought Area Relief Act has been passed to enable persons residing in certain areas of Southern Alberta and their creditors to adjust their accounts, and to prevent the dissipation of the resources of needy residents by a multiplicity of action and other legal proceedings.

Any person who has been resident and actively engaged in farming operations in such drought area for at least one year prior to January 1st, 1922, and is still resident and engaged in farming can come within the provisions of the Act.

The duty of the Commissioner is to endeavor to adjust matters between residents in the said area and their creditors so as to provide for the satisfaction of just claims.

Any resident farmer within the drought relief area, or any creditor of such resident farmer, can apply to the Commissioner for an enquiry into and an adjustment of his affairs.

It is recommended that applications be forwarded at once, as if there is any delay the detail work necessary in the adjustment of each account cannot be completed in time after the crop is harvested.

Any resident farmer, or creditor, failing to make application before August 15th next does so at his own risk as it may not be possible to get the necessary help and complete enquiries after that date.

Applications for such relief, and to come under the provisions of the Act, should be made at once, in writing, to the Commissioner, Drought Area Relief Act, 320 Loughheed Building, Calgary, so that steps can be taken to make the necessary inquiry.

For further particulars apply to

E. J. FREAM,

Commissioner, Calgary.

tawa. Old time police songs, forgotten by only but a very few, were sung, ex-policemen gave interesting little talks reminiscent of the early days long before the advent of the iron horse, when the Red River cart and the travois, (barring the police transport wagons), were the only means of conveyance in this "Great Lone Land." Local talent from town helped out materially, the police boys, officers and men, vying with each other in making the guests feel perfectly at home and to make it a night long to be remembered by all.

During the past three or four weeks many of the boys in red have been sent away from this post, some of them going as far north as the Yukon. But wherever they go we know that law and order will be maintained and that the traditions of the greatest force in the world will be upheld by each and everyone of them. One thing is certain—the men of the force are as loathe to leave Macleod as we are to see them depart.

We seem to hear the order: "Right turn. Dismiss," and as 'orders is orders' we must obey.

A number of the townspeople gave the men at the barracks a return smoker on Wednesday evening. There was a good turnout and a most enjoyable evening was spent.

Here and There

The price of wheat is still on the downward grade.

A whiskey spotter said to have been an investigator for the Saskatchewan Liquor Commission, was tarred and feathered recently at St. Walburg. Arrests are likely to follow.

The average Danish farm is less than thirteen acres in extent.

Canada has already spent \$487,152, 558 upon its returned soldiers.

Water from the Waterton Lakes reservoir, should it be constructed, will irrigate 350,000 acres of arable land in the Lethbridge Southern Project.

A hail storm sweeping down a path three miles wide and forty miles long in the Blind Creek and Milo in Central Alberta, destroyed all the crops in its path. The storm lasted thirty minutes, the hail stones being of considerable size.

An African was on trial in a Southern court for an offense against the dignity of the Commonwealth. The jury filed in. His honor asked for the verdict. "We find the defendant guilty," the foreman replied, "and fix his punishment at thirty-five years in the penitentiary." You could hear a pin drop as the prisoner was asked: "Have you anything to say?" And, as he rose to his feet: "Yo' honor, I has only dis much to say. You white gemmens sure is liberal wif some one else's time."

BUCOLIC BLISS.

Oh! give me the life on a fine old farm. With a playful cow to chew my arm, With a wash-basin set outside the door And a churning spilt on the kitchen floor; With its pie for breakfast, lunch and tea— Oh! a country life is the life for me. At three a.m. on this fine old farm You rise to the strains of a tin alarm, And it's no use trying to prolong your snores

For you've got to take a lantern and do all the chores. Yes, down on the farm you're as busy as a bee And that's why the country is the place for me. Life is far from being dull on the fine old farm

For there's fractious beasts aplenty always meditating harm; An automatic mower's always tryin' to mow your shin; When you draw the drinking water you quite often tumble in; I wouldn't say a farmer's life doth lack variety,

And that is why the country is the very place for me. Even in the even on the fine old farm There's a subtle something radiates a most peculiar charm;

In summer you can muse beside the vish from their coop; And listen to the chickens peeping peevish from the ir coop;

In winter you can often get a chance to dissipate By perching on the wood-box with the "Farmer's Advocate."

Why I remember once this kept me p so very late That I lost myself completely until close to half-past eight.

And now you know the reason when I say emphatically, That the life out in the country is the only life for me.

—Royce McArthur.

Tenders Wanted.

SEALED TENDERS, marked "Tenders for the D. Mills land," will be received by the undersigned up to the 10th of July, 1922, for the purchase of this property near Standoff owned by the late David Mills, being "all of those portions of the north half of the north half of section 22, in Township Seven (7), Range twenty-five (25), West of the 4th Meridian, which are not covered by any of the waters of the Belly River, containing 155 acres, more or less." Tenderers please make two offers, one to be paid cash in full and the other half cash with the balance payable in three equal annual payments with interest at seven per cent. per annum. The lowest or any tender not necessarily accepted.

R. N. WILSON, Standoff, Alberta.

June 8, 1922.

If You Trade Out of Town, and I Trade Out of Town WHAT WILL BECOME OF OUR TOWN? THE DOLLAR SPENT IN MACLEOD WILL "REMAIN HOME TO BOOST" THE MACLEOD TIMES "TRADE AT HOME" CAMPAIGN

READ THE "TRADE AT HOME" ARTICLE ON THIS PAGE CAREFULLY

IT MAY PRESENT SOMETHING YOU HAVEN'T THOUGHT OF BEFORE. PATRONIZE THE PEOPLE WHOSE ADVERTISEMENTS ARE HERE. THEY ARE NEIGHBORS AND WILL TREAT YOU RIGHT. THE MONEY YOU SPEND WITH THEM STAYS IN CIRCULATION IN YOUR DISTRICT.

YOU SHOULD BE AS LOYAL TO YOUR COMMUNITY AS TO YOUR NAME.

(Copyright)

The Macleod concerns listed here, conscious of the fact that thousands of dollars are being sent out of this territory for merchandise that can be bought at home, have launched a campaign in the hope that it will create a stronger feeling of community interest—a sentiment most vital for the prosperity of the entire community. In bold type you therefore read the slogan that they propose to popularize "TRADE IN YOUR HOME TOWN."

The time for consideration of this question could not be more opportune than the present. "Preparedness," the watchword of Canada, should begin at home and can be exemplified in no more far-reaching manner than by real co-operation in this vitally important "TRADE AT HOME" movement. It is a thought that should be taken to heart and given consideration by every person who earns their living in, or owes their success to, this community.

This campaign is launched in the firm belief that the people of this community will follow the dictates of their good sense, and bring the "TRADE AT HOME CAMPAIGN" to an actuality that will be of vast benefit to the entire territory.

This movement is no selfish propaganda of these progressive concerns who have combined in co-operative community appeal. They urge that you read the brief message they will give you each week through the columns of The Times.

The first resolve to "TRADE AT HOME" will not only help the retail merchants, but the manufacturer and jobber, the farmers adjacent to our town, and it will also help in every line of business. It will either directly or indirectly benefit every individual of this section.

The Kootenai Valley Drainage Scheme

One of the big reclamation projects of the West, which is receiving particular attention at the present time, is the reclamation of the Kootenai Valley in Southern British Columbia and Northern Idaho. The land involved is a large area, embracing more than 100,000 acres, and the problem is an international one.

To enable the governments concerned to formulate plans for the consummation of this project, engineers of British Columbia and Idaho are

gathering data. To this end, it is reported, a conference will be held shortly. If in the judgment of the conference the project is pronounced feasible, a treaty between the two governments will be necessary to begin actual work on the reclamation. The government at Ottawa has made overtures to the United States, inviting them into an arrangement by which the lands may be reclaimed.

Mr. Hughes, secretary of State, recently advised the British Embassy at Washington, D. C., that the present administration would take up the project. The main reclamation work will have to be done along the west arm of Kootenai Lake. Certain necessary drainage work must be put through first, and this can be carried out by drainage districts formed under the laws of British Columbia and Idaho, but they would count for little in the ultimate unless the main work is consummated.

There are, however, 4,480 acres in the extreme southern end of these lands, adjoining Bonner's Ferry, Idaho, which are an exception. This drainage district may be reclaimed successfully, except in excessive high water, by ditching and dyking, because the river banks are eight feet higher than the average at the national boundary line. A few Idaho land owners formed this drainage district to demonstrate the practicability of such internal drainage works, and as an evidence of the determination of the Idaho people to have their reclamation work carried out on a sound and economical basis.

The British Columbia residents along the overflowed area saw that the drainage work to improve the lands in Idaho had to be done in British Columbia, and they determined that it should not be made a stumbling block. Accordingly, they have let the contract for this work, and they have sold the bonds at par to the contractor who is putting through the drainage job.

Allenfields News

Allenfields will have big doings on Saturday, July 1st, weather permitting. Football, baseball and other sports will be held and a picnic lunch at which all will gather and where the eatables, which all are expected to bring, will be placed together in a common centre. Five baseball teams, representing Stand Off, Ardenville, Allenfields, McBride and Macleod, will be present to contend for the honors of supremacy. There will also be a football match played between Allenfields and Macleod players, and for the younger generation sports aplenty. A cordial invitation is extended to all to be present on the occasion.

Fairly heavy rains fell in the earlier part of the week, but further south the downpour was much greater. We do not complain, however, realizing that in other and nearby districts little or no rain has fallen for some considerable time.

The grasshoppers are getting pretty

well thinned out and by the end of the week the farmers will have got the upper hand of the pests. There has been sufficient bait obtainable at all times.

A MENACE TO GRAIN CROPS

The Western Wheat Stem Sawfly was originally confined to wild grasses with reasonably large stems. Lately it has increased its depredations until it threatens entire wheat regions. Plans of control suggested in a recent bulletin issued by the Dominion Department of Agriculture, Ottawa, is: first, plough down all infected stubble between August 1 and June 6 of the following year, taking care that there is no overlapping edge; second, cut rye grass between July 5 and 20 in order to kill the infesting larvae before reaching the ground; third, the same method can be applied to brome grass, but it is not always necessary or advisable, as that grass is seldom threateningly infested and is of importance for the rearing of parasites; fourth, thin strips of wheat on land intended for summer fallow will serve for trap purposes and the fallow should be ploughed before the middle of July; fifth, sow immune crops in rotation, such as oats, barley, and winter rye. Clover, flax, and broad-leaved plants generally are immune.

The foregoing treats in brief of control methods, but farmers would best serve their interests by studying the pamphlet which can be had free on application to the Publications Branch of the Department. It should be borne in mind that co-operation is necessary for the efficient fighting of insect pest invasion.

ATTRACTIONS AT THE CALGARY EXHIBITION

CALGARY, June 29.—The world's fastest automobile, Sig Haugdahl's three mile a minute Wisconsin Special, will be among the attractions at the Calgary Exhibition June 30 to July 7, as the result of arrangements made by the management with the newly crowned speed king.

The giant 270 horse power machine is to be on display throughout Exhibition Week and on Thursday and Friday, auto race days, it is to be driven in the time trials during the speed contests, when new world records for circular tracks will be sought by the half score of nationally known drivers who will be in Calgary for the racing events.

The big machine which Haugdahl is bringing to Calgary travelled one mile in 18.97 seconds, three miles a minute, or at the rate of 180.27 miles an hour, the greatest speed ever made by a human being on land or water. A huge hydroplane motor, built entirely of aluminum furnishes the power for the unique machine. The body of the car is but twenty inches wide and is stream lined in every detail to reduce wind resistance. It is expected to be one of the biggest attractions of the exhibition.

The biggest fun festival of the year will take place at Calgary when the Exhibition opens on June 30 and continues to July 7. An entertainment program that calls for harness racing, running races, vaudeville, fireworks, auto racing, band music, auto racing, band music, auto polo, massed choir, has been arranged for the edification of visitors to the big show.

Action will be crowded into every minute of the fair, and the program is so varied that it is bound to please everybody. The vaudeville has been recruited from all parts of the globe, and a half dozen thrillers have been booked that are certain to prove a sensation. Among the stellar attractions will be the Six Belfords, Fink's Comedy Mule Circus, Burt Earle's Girls, the Flying Floyds, Randow Trio and the Gladys Attree Dancers. In addition to these high class acts, there will be a score of splendid shows on the midway, where Johnny J. Jones' famous attractions will hold forth.

On July 6 and 7, the world's foremost automobile drivers will shake dice with death by circling round the half mile track in a series of races. J. Alex Sloan, who will be in charge of the automobile racing program, declares that all existing dirt track records will be smashed when the speed demons cut loose with their high-powered mounts.

With purses totalling \$7,800, lovers of harness racing are assured of some good racing. More than 60 horses have been entered in the various events. The feature races are the 2:25 pace, purse \$800, on July 1st; the 2:20 trot, purse \$800, July 3; and the free-for-all, purse \$800, July 5, with such horses as Phil Patch 2:05½, and Main Direct 2:04½ entered.

Four big days of running races are also scheduled, with \$6,400 in purses offered. Entries will not close until the night before each race, and the manager of the Exhibition predicts that the finest field of runners that ever faced a starter, will compete in this year's races. The Alberta Handicap, purse \$300, will be run on July 1st, with the Calgary Derby for \$500, will feature the July 4th card.

For the evening programs, the big fireworks spectacle "Breaking the Hindenburg Line," or "Tanks in Action," will be the stellar attraction.

And there will be plenty of music. Three big organizations will give daily concerts. They are the Elks' Band, the Fiftieth Battalion Band and the Massed Choir of 250 voices.

All in all, the entertainment pro-

gram should be the best ever staged in Calgary.

If any child seventeen years of age and under in Southern Alberta, Red Deer and south, has not received an invitation to be the guest of the Calgary Exhibition on July 7th, they may receive same upon application at the main entrance to the grounds on Girls' and Boys' Day, July 7th, one of the biggest days of the fair.

SOCIAL AND CARD PARTY

On Tuesday evening last a card party and social was held in the separate School Hall, under the auspices of the Catholic Ladies of Macleod. The hall was beautifully decorated with evergreens and wild roses, the credit falling to Mr. Burke and Mr. Huntley. The hostess, Mrs. Kennefick, warmly welcomed all and made

them feel at home. Court Whist, being the evening's game, came under the management of Mr. J. W. McDonald, K.C. During the game no player was allowed to speak and the deaf and dumb alphabet was much in evidence, but under the stern eye of the management the ladies kept self-control. The lady's prize was won by Miss Lemire and the gent's by Mr. J. Burke.

Immediately after the cards a musical program was given. The first number, by Rev. Father Rouleau (violin), Miss G. Genge (violin), and Miss Dolly Genge (piano), the playing Humoresque by Dvorak, was certainly appropriate judging by the applause which was given to these artists, and regrets were expressed that no encores would be given. The blending of the three instruments was a treat to the musical ear. The next item, a song by Miss M. Watson, "When Song is Sweet," accompanied by Miss L. Thomas, also received prolonged applause. The third and last item, a song by Rev. Father Rouleau, "One Flitting Hour," with violin obligato Miss G. Genge and Dolly Genge accompanist, was enjoyed by all. It is to be hoped that Macleod people will have the pleasure of hearing these artists again in the near future.

Luncheon was served after the program and came under the able supervision of Mrs. Huntley, Miss M. McMartin and Miss Helen Parker, who are to be congratulated for the style and manner in which it was carried out.

The evening closed with Mrs. Huntley playing a few dancing numbers on the piano, to the enjoyment of the young folks.

An Egyptian mummy with bobbed hair has been found. This will greatly strengthen the modern girls in ignoring their own mummies in this matter.

DEATH OF JAMES MURRAY ROTHNEY

The death occurred on Wednesday, June 28, under very sad circumstances of James Murray Rothney, one of Macleod's best known and most promising young citizens. He had been laid aside by illness for the last eight months and passed away peacefully in Galt Hospital, Lethbridge, as the result of an operation.

James Murray Rothney was born in January, 1902, in Aberdeenshire, Scotland, and came to Canada as a boy of nine years. He had grown from boyhood to manhood in this city, passing through the various grades of the Macleod Public and High Schools with a brilliant record. He obtained his First Class Professional Certificate before the age of seventeen and began his teaching career in Howe School. In March, 1920, he became vice-principal in Connaught School, Medicine Hat, and held that position for over a year. In September of last year he was appointed to the principalship of Warner Consolidated School, but was taken suddenly ill while spending Thanksgiving in Macleod. He was intimately connected with the activities of the Sunday School of St. Andrew's Presbyterian Church and took a keen interest in work amongst the younger boys, qualifying last summer as Cadet Instructor after a course in Calgary. He was at all times an eager student and looked forward to entering upon the study of medicine at the University of Alberta in the fall of this year.

The Food Value of Dairy Products

Milk and dairy products generally are of inestimable value to the human race, and their comparatively moderate cost makes them accessible to practically everyone. Further than that, the products of the dairy add immensely to the wealth of the country. It is a question if the people of Canada sufficiently appreciate the economic value of the dairy industry to the country at large, or the food value of milk and its products to the individual. In Britain the consumption of cheese per capita greatly exceeds ours. In butter we do better; but in milk our consumption individually has been shown to be one-quarter of a pint compared with half a pint per head in the United States. Since the advent of prohibition, however, the U. S. consumption per capita has increased to three-quarters of a pint, and there is evidence to show that Canadians are also taking a great deal more to the lactical fluid than formerly.

The importance of milk in the diet of both young and old is constantly being emphasized by the medical profession. Mal-nutrition or under-nourishment, it should be understood, is not always the result of insufficient food, but frequently of unwisely and improperly chosen foods. This is supported by the fact that investigation has shown that a large percentage of under-nourished children are the offspring of well-to-do parents. The thoughtful mother will see that her children get plenty of milk from which to build a strong frame-work, develop mental capacity, and good health. Future happiness depends largely on these factors.

LETHBRIDGE EXHIBITION

The Lethbridge Agricultural and Industrial Exhibition which is to be held this year on July 31st, August 1st and 2nd, gives promise of being the best which has been staged in that city since the event was inaugurated. Much interest is being taken by prospective exhibitors and the live stock show and display of agricultural products is likely to surpass all former records. An attractive programme of races and entertainments has been arranged. Purse amounts to \$1,100 are being offered for seven races on each

LEONARD EAR OIL

Improves Hearing, Relieves Head Noises

Nine out of ten cases of DEAFNESS and HEAD NOISES are caused by catarrhal mucus (matter) in the Eustachian Tube, which connects the nose and the ears. Leonard Ear Oil removes the MUCUS, OPENS UP THE TUBE and THE OTHER AIR PASSAGES OF THE HEAD, and the result is improved hearing and relief from Head Noises. It is not put in the ears, but is "INSERTED IN THE NOSTRILS" and "RUBBED IN BACK OF THE EARS" and special instructions by a noted Ear Specialist in each package for different kinds of Deafness and Head Noises tell you exactly how to take care of your own case. Leonard Ear Oil is not an experiment but has had a sale of over a MILLION BOTTLES since 1907, and every year it has relieved thousands of people of their Ear Troubles. No matter how long you have been deaf, nor how deaf you are, or what caused your deafness, or how many things you have already tried which have failed to relieve you, Leonard Ear Oil has relieved many such cases as your own. Why not you? A bottle lasts more than 30 days if used twice a day according to directions. The price is \$1. Thus it costs you LESS THAN 3c a DAY.

STRYCHNINE CAUSED DEATH OF IDA HOGG

The inquest on the death of Ida Hogg, who died suddenly on Sunday, June 18th, 1922, was resumed on Monday before Coroner Grady at the A.P.P. office. The evidence was reviewed of the eleven witnesses who had given testimony last week, and Dr. S. J. Kirk was called again. He read to the jury the reply he had received from the government analyst in Edmonton, which was as follows:

"I beg to advise you that I have analyzed the contents of the two jars received from you, these being marked: Stomach of Ida Hogg, age 19 years, died suddenly about 11:15 a.m. June 18th, 1922, suspected strychnine poisoning, and right kidney and part of left lobe of liver of Ida Hogg. I find strychnine present in this stomach and in kidney and liver. I have also examined contents of small vial received from you and find strychnine present in vial, there being approximately one-fourth of a grain.

(Sgd.) JAMES A. KELSO,
Provincial Analyst."

After many questions to Dr. Kirk by the jury they retired for half an hour and returned with the following verdict:

"Ida Hogg died from strychnine poisoning, Sunday, June 18th, 1922. From the evidence submitted we believe it was self-administered. Where and how the strychnine was obtained we have been unable to determine. We are of the opinion that the restrictions surrounding the obtaining of deadly poisons should be more rigid. Signed, Fred Morris, foreman. Robt. Cunningham, S. Heap, C. P. McGladdery, F. Tatham, Chas. K. Underwood."

TREASURE LOST 300 YEARS AGO

Penetanguishene, Ont., June 15.—The treasure-seeking dredge, Baltic, left the Midland docks this morning for the Wye river, from beneath whose water she hopes to recover the mysterious iron box believed to be the missing seventh box of Jesuit altar vessels and treasure which was lost more than 300 years ago in a panic that followed a false alarm that the Huron tribes had concentrated for the purpose of murdering the black-robed missionaries and the handful of troops of old France who had followed them into the wilderness of the new world to establish a spiritual empire among the savages.

Further investigations made into the early historical documents of the society of Jesuits appears to confirm the belief that the box, when opened, will be found to contain the complete set of gold altar vessels presented by the court of France to the chief mission to Huronia at Fort Sainte Marie, as well as the pay chest for the soldiers and some silver relics of unknown form and value. The interest of the church historians, however, centres about such documents as may be found when the chest is opened.

CARD OF THANKS

Mrs. J. T. Marks, J. W. Walker and Lorne Walker wish to tender their sincere thanks to their many friends for the kindness and sympathy shown to them in their recent sad bereavement, also for the many beautiful floral tributes.

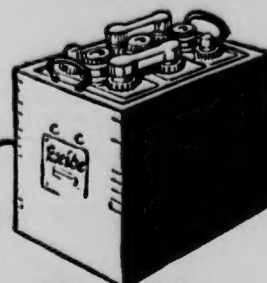

Two prospectors, Edward Forsam and J. Kennedy, after an exciting battle, shot a grizzly bear in the White Creek district, B.C., which measured 15 feet standing erect. The animal weighed 1800 pounds, the skin alone weighing 100 pounds and measuring 12 feet long and nine feet wide. Its foot print was 18 inches long and 9 inches wide. The bear fought the prospectors and it took five bullets to kill him. When he fell he was but two feet away from Kennedy who had become entangled in the brush. It is one of the biggest bears ever shot in the district.

One would think that the Irish would pause now and then long enough to find out what they are fighting about.

A doctor says: "If golf and business clash, quit business." That doctor must be a regular feller.

IMPOUNDED ANIMALS

TAKE NOTICE that the following described animals are impounded on the Blood Reserve, under regulations made by the Indians of the Blood Band. Animals are held at the dipping vat about 10 miles south of the Blood Agency office.

1 Black Mare strip, with unbranded yearling colt at foot, aged, branded seven reversed B monogram over lazy E on left thigh.

1 Bay Gelding, gentle, branded hB on left thigh.

1 aged Black Gelding, branded lazy J over dot, over lazy J over dot, on left shoulder.

1 small Bay Mare, aged, branded bar under and over B on left thigh and reversed L F connected on right thigh.

1 Bay Gelding, white face, 3 years old, 2 white feet, small narrow white strip on left side under flank, no visible brand.

1 aged Bay Saddle Pony, branded W over X over quarter circle points up on left shoulder.

1 aged Brown Mare, branded W inside triangle on right shoulder.

1 aged Brown Saddle Horse, branded ship wheel on left thigh, K over 4 connected on right shoulder.

1 Black Mare, branded reversed 7 H on left shoulder.

1 Black Gelding, 3 years old, branded reversed 7 H on left shoulder.

1 Bay Filly, 1 year old. No visible brand.

1 Dark Brown Gelding, branded lazy C over lazy rowlock on left shoulder.

1 Light Sorrel Mare, white face, about 4 years old, 4 white feet, small white patch on top of right hip, no visible brand.

1 Bay Mare, branded F X on right thigh.

1 Brown Mare, branded half diamond points down over B, inverted D pick lazy F on left thigh.

1 Grey Gelding, branded F X on right thigh.

1 Sorrel Pony, white face, branded reversed B C monogram on left thigh.

1 Black Gelding, large scar on left hip, branded bar over half circles connected open points right and left on left shoulder.

1 Bay Gelding, 3 years old, no visible brand.

1 Brown Mare, branded A to left over 4 connected on left shoulder.

1 Bay Roan Mare, branded Z A over quarter circle points down on left shoulder and lazy half circles interlocked points out on top of left hip.

1 aged Brown Pony, mare, 3 white feet, star and snip, branded lazy B on right hip and S B over lazy R in half circles on left shoulder.

1 aged Pony, bay, mare, branded E H over bar on right hip and half diamond points down on right jaw.

1 Grey Gelding, 5 years old, branded half diamond points down over A on right shoulder.

1 Black Gelding, star, left hind foot white, no visible brand, wire scar on right hip.

1 aged Black Gelding, star, 2 white hind feet, wire cut on right shoulder and right stifle, blotch brand on left shoulder.

1 Bay Filly, small star, 3 year old, no visible brand.

1 Roan Filly, 3 years old, no visible brand.

1 Black 2 year old Gelding, strip in face, left hind foot white, no visible brand.

1 aged Grey Pony Gelding, gentle, branded double bracket on left shoulder, branded L S on right shoulder and A on left thigh.

1 Blue Roan Pinto Mare, white

face, roached foretop and tail, no visible brand.

1 White Mare, branded open key reversed R connected on left shoulder.

1 Bright Bay Mare, star, yearling gelding at foot, no visible brand.

1 Bay Gelding, saddle horse, star, 2 white hind feet branded bar rowlock bar on left thigh.

1 Bay Clyde Mare, strip, branded X on left hip.

1 big Dark Bay Gelding, weight about 1450 lbs., brand appears to be blotch on right shoulder.

1 Bay Clyde Mare, strip, about 4 years old, 2 white hind feet, no visible brand.

1 Bay Mare, thoroughbred type, weak on ankles, small split on right car, gentle, no visible brand.

1 Roan Gelding, about 5 years old, branded O L on left shoulder.

1 Black Gelding, branded bar over S X on left hip and V over bar over V points down on right shoulder.

1 Roan Pinto Mare, colt at foot, scar on left shoulder, brand appears to be blotched P over K connected on top of left hip.

1 grey 2 year old Filly, no visible brands.

1 Mouse Color Filly, 3 years old, branded lazy S over H on left hip.

1 Brown Gelding, 3 years old, right hind foot white, left front foot club footed, blind right eye, no visible brand.

1 Dark Brown Mare, strip, 3 white legs, branded T over J on right shoulder.

1 Sorrel Filly, 3 year old, right front foot white, left hind foot white, star and short strip, no visible brand.

1 aged Mouse Color Pony, mare, star, 2 white hind feet, branded quarter circle points down over reversed F on left jaw.

1 aged Bay Gelding, branded trowel on left hip.

1 Bay Gelding, strip, 4 white feet, branded bar over reversed G K on right shoulder.

1 chunky Dark Bay Gelding, star and snip, branded reversed R over quarter circle points down on right thigh.

1 Dark Brown Gelding, 3 year old, no visible brand.

1 Bay Roan Gelding, blind right eye, branded P over E on left thigh.

1 Bay Mare, gentle, narrow strip, 4 white legs, saddle marks, no visible brands.

1 Dark Bay Gelding, strip, 2 white hind feet, about 4 years old, no visible brand.

1 big Dapple Grey Mare, weight about 1450 lbs., colt at foot, brand appears to be H lazy F on right shoulder slightly blotched.

1 Bay Mare star, yearling at foot, indistinct brand on right shoulder appears to be M U monogram over half diamond points down run together.

1 aged Chestnut Gelding, branded M P monogram on left shoulder and lazy 8 on right shoulder.

1 Iron Grey Gelding, gentle, tail being cut, weight about 1250 lbs., wire cut right hip, no visible brand.

1 Bay Gelding, 3 year old, branded half diamond points down over reversed K on left jaw.

1 Bay Filly, 2 year old, narrow strip 2 white feet, no visible brand.

1 Cream Colored Mare, branded reversed K over 7 connected on left hip.

1 Black Mare, colt at foot, branded reversed F U monogram on right jaw.

1 aged Grey Gelding, branded quarter circle points down over star on left thigh and O bar A right shoulder.

1 Dark Bay Mare, 3 years old, 3 white feet, star, no visible brand.

Value of Cheese

As a Food

Its Consumption Three Times More
Per Capita in Britain Than
In Canada

A companion pamphlet to Miss Helen G. Campbell's "Why and How to Use Milk" has been published by the Dominion Department of Agriculture, Ottawa. This pamphlet is entitled "Why and How to Use Cheese." Besides giving a history of cheese making and of the different kinds of cheese—of which it will surprise most people to hear there are some 250—upwards of three dozen methods are described in which cheese can be used to make savory and nutritious dishes.

All cheese making in Canada was carried on as a farm industry until 1864, when the first factory came into existence in Oxford county, Ontario.

In the following year a factory was established in Missisquoi county, Quebec. The progress of factory establishment was so rapid that in a few years the system was generally adopted, and farm-made cheese became a rarity. While every one of the nine provinces has its cheese factories, about 97 per cent. of the production has to be credited to Ontario and Quebec. Incidentally it might be mentioned that the total value of the cheese made in this country runs up to between thirty-five and forty million dollars per annum, and the quantity totals up to around a hundred and fifty million pounds, sometimes over and sometimes under. The variation in production is considerable, as will be understood when it is stated that

in 1914 it was 169,478,340 pounds, and in 1920 nearly twenty million pounds less.

In Canadian factories the manufacture of cheese is mostly confined to what is known as Cheddar, but genuine Stilton is turned out on the Dominion Experimental Farm at Agassiz, B. C., and the Trappist monks at the Oka Agricultural Institute in Quebec make what is known as Oka cheese. Another form of cheese made in this country is Cottage cheese, which is made in many households from sour skim-milk without the aid of rennet. For cream cheese there is also a demand of some dimension. Miss Campbell dwells on the advantages of cheese in the diet, tells how it can best be kept, and suggests that Canadians would be well advised to eat more of it than they do. This suggestion gains force from the fact that the consumption of cheese in Britain is about four times per capita more than it is in this country.

Clearing Out!

The remainder of our Sport Skirts, Misses Dresses and White Canvas Boots. In order to clear out our lines in above goods prices have been greatly reduced. These articles are new in fabric and design and are first-class in every particular.

R. T. BARKER

LOCAL AND PERSONAL NEWS

Saturday next is the 1st of July and a public holiday.

Farmers are urged not to look upon weed inspectors as policemen, but as friends.

Mr. and Mrs. Geo. L. Grandison, Sr., and daughter, left on Sunday last for bonny Scotland. Good luck go with ye.

The electric light system was somewhat demoralized during last night's storm and any old illuminant was welcomed, even the despised tallow dip being given a place of honor in many homes.

Sergeant Caswell, of the A.P.P. effected the arrest, on the 24th inst., of a man named Scott, wanted for the theft of a motor car from a resident of Edmonton. The prisoner was returned to Edmonton on Tuesday.

The U.F.A. service held in the Rathwell school house on Sunday was attended by a goodly number of people who listened with close attention to the utterances of the speaker, Mr. Crowson. The singing of Mr. and Mrs. Harvey was a special feature of the service.

A reduction of 6 cents a bushel on grain shipped from Macleod and other points in the south comes into effect on the 6th of July. This is a ruling made by the special house of commons committee on freight rates which is expected to be adopted before the session ends.

It is noticed, when passing through brushy land, that myriads of a species of brown moth, closely resembling the miller moths so common during the summer months, are very much in evidence. It is thought that this moth is responsible for the presence of the green worms that seemed to subside almost wholly on the Russian Thistle in fields in this neighborhood a year ago.

A severe electrical storm, one of the worst experienced here in years, and which was accompanied by a perfect deluge of rain lasting for several hours, visited the entire south country last night. The lightning was intensely vivid but up to time of writing no damage has been reported from this cause. The downpour of rain occurred at an opportune time and will do an immense amount of good to the growing crops.

Farmers complain that almost all their entire time is being devoted to obtaining and putting out poisoned bait for the hoppers. This being the case how can they attend to the weeds which is now being demanded of them, or even do the necessary summer fallowing? It looks as though too many laws governing the actions of farmers are being put on the statute books—and neither the Liberal or Conservative parties can be blamed for the present state of affairs.

Sir George Foster, speaking in the Senate on the second reading of the wheat board bill, declared that parliament was being asked to pass what was absolutely unadulterated class legislation in operation and motives, giving farmers an absolutely water-tight compartment for 75 or 80 per cent of the wheat produced in Canada. It seems only fair that the men who produce the wheat should have the most to say in its disposal. But evidently George Foster considers the speculator the proper person to control the situation.

Mr. C. S. Segre, who is employed by the United Creditors Association as a credit expert, is calling on the local business men in the interests of his firm, and is meeting with much success in placing with them a very efficient system of collecting outlaid and hopeless accounts, uncollectable notes, judgments, etc. Mr. Segre in explaining the service to the manager of The Times certainly convinced us of its efficiency. While it is Mr. Segre's intention to call on all local business men personally, his time is limited to Friday evening of this week, and anyone wishing to consult him may do so at the Queen's Hotel Thursday and Friday evenings of this week.

In order to handle the increased traffic on the main line of the C.P.R. last week, the two trainmasters on the Lethbridge division, C. C. Stibbard of this city, and H. M. Smith of Macleod, were loaned to the Calgary division. Twenty-four special trains were handled in eight days, the trains carrying homeward the thousands of Shriners from the convention at San Francisco. Not a single train was late, and so satisfactory was the service rendered by the Canadian Pacific that G. W. Teare, chairman of the transportation committee of the Al Koran Temple, Cleveland, said: "I have never in all my travels and experience with transportation lines experienced better service than that provided in this instance by the C.P.R. It is the best in America."—Lethbridge Herald.

Foster predicts bad hail storms this year. Protect yourself by Insuring in a strong Hail Company

K.A.Y. REALTY CO.

Mrs. S. J. Kirk will not receive Thursday, July 6th, nor again this season.

Mr. and Mrs. James Davey are leaving at the end of this week for a month's visit to the coastal cities.

As a result of the electrical storm the telephone service is somewhat demoralized today.

Mrs. J. Kendall and child, of Lethbridge, are spending a few days with Mrs. Kendall's mother, Mrs. C. Clarke, of Rathwell.

Crop conditions in the west have been greatly benefitted by recent heavy rains, Manitoba and Saskatchewan getting the rain at just the right time to do the most good.

An election was held on Monday last to fill a vacancy on the town council caused by the retirement of Councillor A. McDonald. J. W. Moreash was declared elected by acclamation.

The schools closed down for the summer holidays on Thursday of this week. And now the question uppermost in the minds of all the children is "Where shall we go for our holidays?"

During last night's storm the flag staff at the barracks, from the summit of which for over thirty years has flown old England's emblem of liberty, was struck by lightning and given for nearly half its length. It seems a coincidence that the pole should be destroyed when there would appear to be no further need for its services. The Public School flagstaff was also hit and badly splintered.

Professor MacGibbon, lately appointed commissioner to prepare a case for Alberta in regard to amendments to the Banking Act, which will come up for revision at the next federal parliament, will hold a public sitting at Macleod, Friday July 21st. Farmers and business men should attend and give evidence on the banking situation in this district.

The workmen engaged in excavating for the sewer connection behind the Metge block evinced surprise upon discovering the fact that this brick block rests entirely upon the natural gravel formation and not upon a concrete bed, as is customary. A more substantial foundation than the gravel, which in many places is strengthened by a deposit of natural cement, it would be hard to find anywhere.

The law offices in Macleod will close to the public at four o'clock each business day during July and August except by appointment. This of course will not affect the usual Wednesday half holiday when the offices will be closed as usual except on a Wednesday afternoon in a week when a Statutory holiday falls when they will remain open until four o'clock.

We are gradually nearing the season when the last rose of summer will be noticed blooming alone and when the cold winds of winter will be upon us. This reminds us that the coal miners are still out on strike and no coal is being taken from the mines for next winter's use. It is to be hoped the trouble between mine owners and workers will be patched up at an early date, otherwise many will suffer great hardships this coming winter.

The aeroplane flight from Lethbridge to Ottawa was nipped in the bud at Minot, N.D., the plane coming to grief when landing after a test flight by Palmer who, to avoid two women in a car directly in the line of flight of the plane, rammed the machine against a fence. As it was impossible to make repairs, the machine was stripped and returned to Lethbridge. The machine was unfortunately from the first, being delayed owing to heavy electrical storms and again at North Portal when a wing of the plane was badly torn while a landing was being effected. No doubt another attempt will be made later.

No further developments have arisen in the Aitchison disappearance case. If the woman met death by drowning her body by this time should have appeared on the surface and if so may have become stranded in one of the numerous bends along the course of the river, or running foul of a projecting snag be prevented from going further. Another close search of the river has been made during the week and every channel of running water closely inspected, also a close watch being kept on the wire net stretched at the Monarch bridge. There is a feeling amongst many that the missing woman never went near the water at all, as had such been the case a trail leading from her clothes would have been picked up by the bloodhounds. At present a dense mystery surrounds her actions from the time she was last seen. Many and startling rumors have been in circulation for some days, but nothing of a reliable nature has developed. At present it looks as though her disappearance would be one of the many never accounted for.

In Europe highly fashionable women are having their little toes amputated so as to wear narrower shoes. No amputation process is necessary with regard to giving them narrower minds.

Thousands of pulpits are vacant in the U. S. because of lack of enough support to pay ministers. The other kind of pewgillists continue to draw big crowds.

Fry's Iced Chocolate

RECIPE: Keep on hand a syrup made up of one half cup of FRY'S Baking Chocolate, one cup of sugar, one cup of warm water. Stir until smooth. Then boil for 5 minutes—chill and add one half teaspoonful of vanilla extract. To serve, allow two tablespoonfuls of this syrup to a glass with a little chopped ice, and fill with cold milk. Stir well.

Try this cooling, delightful FRY drink. You'll want it often.

FRY'S Cocoa may also be used as above.

Petty Persecutions by Sad Sundayites

Now that the summer season is with us the Lord's Day Alliance is again active. Most people enjoy music, and as band concerts in our public parks are a delectable form of entertainment the Alliance naturally objects. Trust the Lord's Day Alliance to stick a pin in anything likely to give enjoyment to others. The Puritans of old it will be remembered, according to Macaulay, objected to bear baiting, not because it hurt the bear, but because the audience enjoyed it. This is much the attitude of the Alliance toward any Sunday recreation.

For years it has been the custom to have free band concerts in Toronto on Sunday, these being given at Hanlon's Point and Scarborough Beach Park. They were enjoyed by tens of thousands of people during the summer months, most of them workers who had little or no opportunity for taking a breather in a cool and pleasant spot on any other day in the week.

However, under the Lord's Day Act, and with a mandate from Ontario's Attorney-General, Sunday band concerts may be forbidden, on the ground that musicians are paid for their work. Which stretches the point a bit in view of the fact that church singers and organists are paid for their work, and that these bandsmen are idle most of the week during the summer months, and are only too glad to get employment.

Be all this as it may the management of these parks have been notified by the Sad Sundayites that if they have music on the Sabbath they will be prosecuted under the law. And as the jurisdiction of the Alliance extends to any Province where there is an Attorney-General who will stand for their nonsense, the banning of Sunday music will, no doubt, extend far and wide. This will particularly apply to Province of Ontario centres, where the population has been bullied so long that mass resistance is no longer dreamed of. Contrarywise in the Province of Quebec the Sad Sundayites get short shrift, as they know much to their own chagrin. The people of that Province at least have still

some appreciation of their rights and privileges.

Of course the thought behind all this sort of persecution is to drive people into church by making it more uncomfortable outside. As already pointed out the pretext of saving of these poor bandsmen from working on Sunday is mere bosh. They would only be too glad to earn a few dollars, and no one would be the worse for it.

But the strange thing about all this petty persecution in respect to making church going compulsory, by taking away all forms of outdoor recreation and amusement, is that it does not succeed in its object. Take the city of Montreal, for instance, as a dreadful example. Their people even go to the movies on Sunday, the amusement parks are filled, and the band concerts listened to. But strange to say the proportion of people in Montreal attending church on the Sabbath day is much greater per capita than is the case in Toronto, where at the moment ministers and others interested are deprecating the fact that their congregations are slipping away from them.

Dressmakers report that women firmly refuse to wear long skirts. What is done with the material they don't wear at the top still remains a profound mystery.

Coal mining is seemly work and the strike is also being conducted in a seemly way.
